

Choosing Which Hand and Arm Rest Fits Your Torch

The Milliron Tools Hand and Arm Rest comes in two versions; a Standard Height Range version and a Tall Height Range version. Most, if not all, single flame torches fit within the range of the Standard Height Range version. The Tall Height Range version is for torches that sit tall on the table.

To determine which version fits your torch, simply position the body your torch at the angle you like to work it at and measure the distance from the table surface to the top of the torch at about $\frac{1}{2}$ " (12mm) back from the base of the flame. If that measurement is between $4\frac{3}{4}$ " (12cm) and $6\frac{5}{8}$ " (16.8cm), order the Standard Height Range version. If the measurement is between $6\frac{3}{4}$ " (17.1cm) and $8\frac{5}{8}$ " (21.9cm), order the Tall Height Range version.
